Creating & Adding Geospatial Data:
Downloading Data

This exercise will require you to use the skills and information you learned in Tutorial 5a and the associated lectures.

To answer the questions, you will need to find the appropriate data online.

Create a map of Portage County, Ohio. Follow the criteria below:

- Include the boundary of Portage County (do NOT use the counties feature class provided – mgisdata)
- Include the city boundaries of Kent and Ravenna (only those cities)
- Include all interstates, and state routes in Portage County (different symbology for interstates)
  - Do not include secondary roads.
- Include the Cuyahoga River in Portage County.
  - Do not include any other rivers/streams
- Include Lake Rockwell.
  - Do not include any other bodies of water.
- Do not include any features outside of Portage county.
- Include locator map (where in Ohio is Portage county located).
- Follow map design best practices (title, legend, etc.)

Export the map as a PDF and submit to Canvas.

Deliverables:
  - PDF of map.
